HKR 2-Component Screwdrivers

...are designed and developed according to the latest demand of the industry for professional use. The large handle are shaped ergonomically for high torque performance with good resistance against aggressive chemical substances. The 2-Component material provides an extensive gripping capacity (rubber) and high durability and torque (shock-resistance plastic).

The 2-Component Handle

- > large heavy duty handle for more power drive
- > high torque performance
- > ergonomic design
- > high performance protection for extremely torque loads

2C Screwdriver

- > made of polypropylene (PP/TPE) material
- > black/blue handle with hole

HKR Chubby Screwdrivers

- appropriate to the 2-Component Series
- > made of polypropylene material (PP)
 - > black handle, 50 mm, with hole

The following special types of blade are available for the different purposes such as

- > precision tolerance tips
- > polished, hardened and sandblasted
- > chrome-plated with black tip

MOV = molybdenum-vanadium steel (MOV/WN 1.2381)

SI = chrome-silicium-vanadium steel (SI/WN 1.2243)

CV = chrome-vanadium steel (CV/WN 1.8161)
